The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolte (WO98/29466) in view of Kest.

See Paper No. 9, paragraphs 3-5.

Applicant's arguments filed 12-15-05 have been fully considered but they are not persuasive. The applicants argue that Kest doesn't show the solventless composition of the claims. Bolte, the primary reference shows the composition.
